

# K-12

Imagine possibilities in education K 12 Nouns

## Introduction

K-12 is a competition in which students from classes 1-12 have to create and demonstrate STEM modules. STEM fields include Science, Technology, Engineering, and Mathematics. The contestants have to prepare a module on topics of STEM. The best-showcased module will be the winner. The objective is to increase interest, awareness, and excitement for science and engineering.

## Prize Money

1<sup>st</sup> Prize: 2500

2<sup>nd</sup> prize: 1500

3<sup>rd</sup> prize: 1000

## Problem Statement

### Round 1 Abstract Submission

The teams have to submit abstracts for their topic chosen. The layout of the abstract is attached below.  Abstract Layout(K12).pdf

### Round 2 Video presentation

The video must clearly explain and demonstrate the module. Participation of all members is compulsory. Marking will depend on topic clarity, coordination of team members, and presentation skills.

## General Rules

- The teams competing in K-12 Competition must complete and submit the abstract by the posted deadline.
- Failure to meet the posted deadline will result in exclusion from the competition.
- Participants have to prepare keeping in mind that the audience will be of the same age group as theirs.
